

Class: 23CLC09 - Introduction to Software Engineering

Group ID: 02

Group name: PixelCrafters

Project name: Jobify

SPRINT REVIEW MEETING MINUTES

Sprint 2 (14/06/2025 - 19/07/2025)

Host: 23127211 - Nguyễn Lê Hồ Anh Khoa

Secretary: 23127211 - Nguyễn Lê Hồ Anh Khoa

Time: 13h00 - 19/07/2025

Members present: 4

23127211 - Nguyễn Lê Hồ Anh Khoa

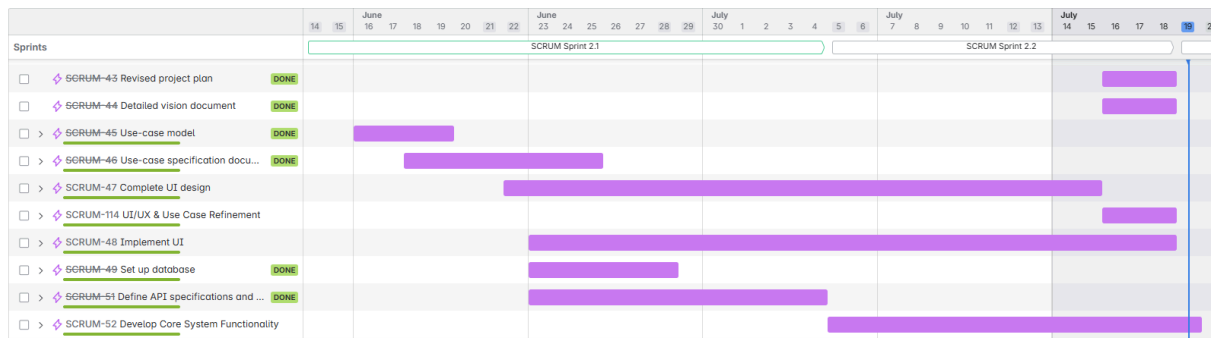

23127040 - Bùi Minh Duy

23127254 - Nguyễn Thị Như Quỳnh

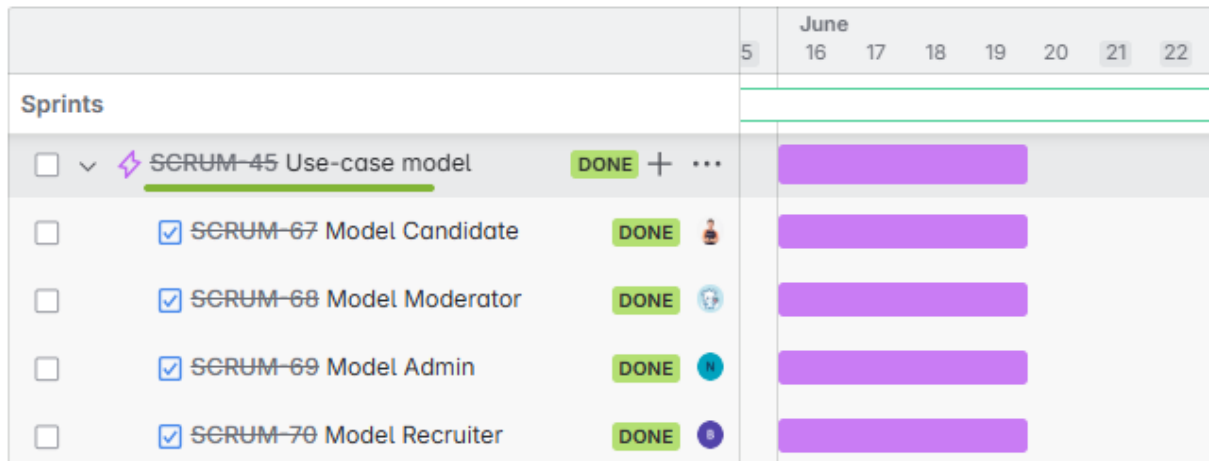

23127524 - Hình Diễm Xuân

Members absent: 0

Completed tasks:

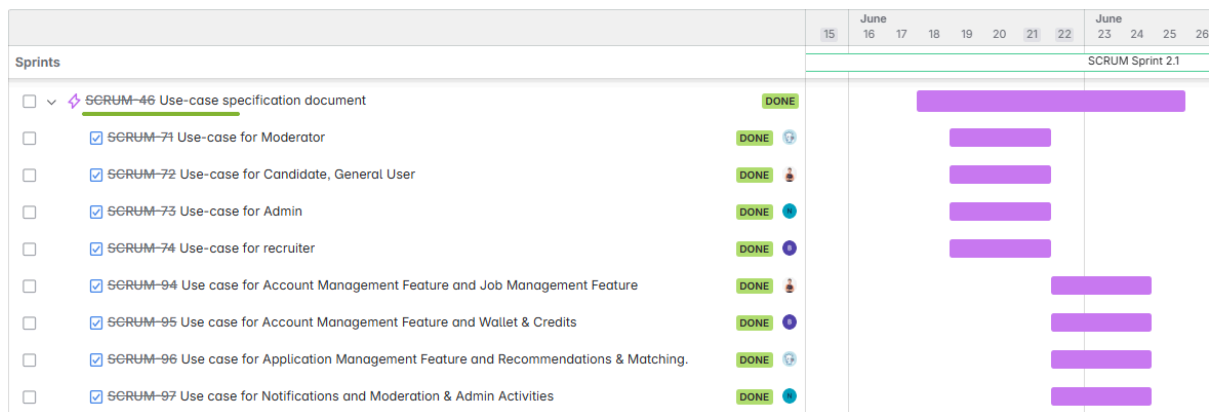

- Revised project plan: not changes
- Detailed vision document: have some changes (view detail in changes.txt)
- Use-case model:

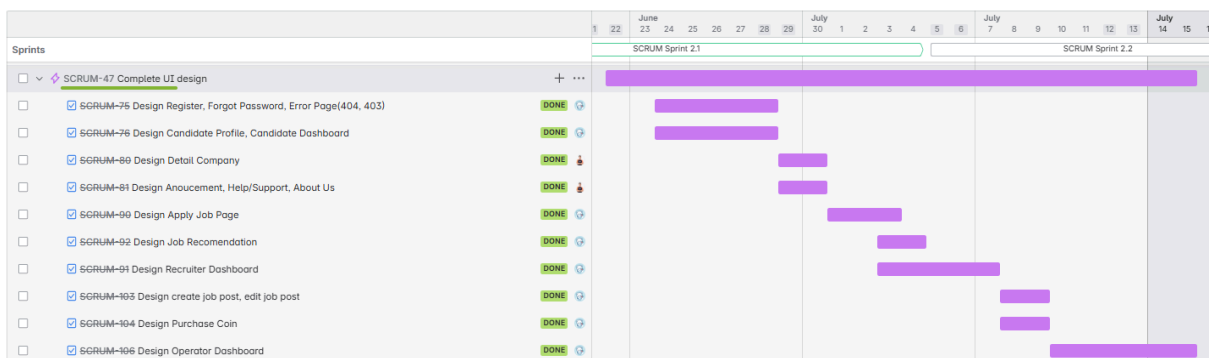

At first, we divide use cases by actor, but after that, we group by feature

- Use-case specification document:

At first, we divide use cases by actor, but after that, we group by feature

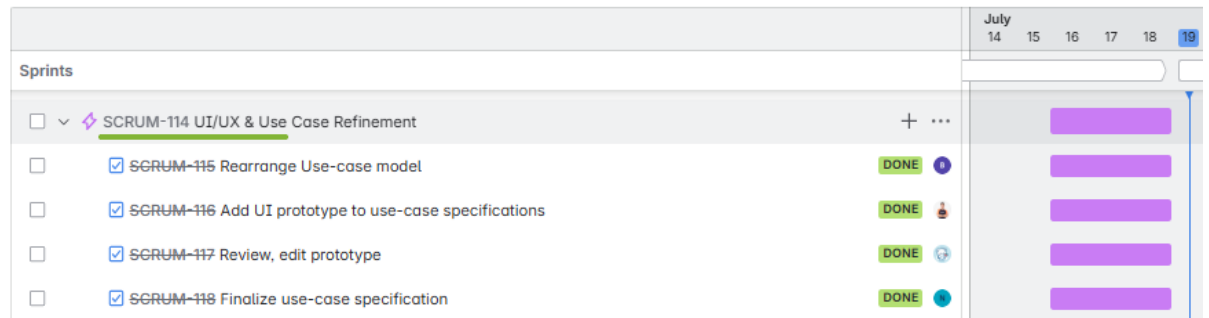

- Complete UI design:

In this PA, Diễm Xuân and Anh Khoa completed the **UI design for all key web pages** of the system, covering both user-facing and functional screens. The

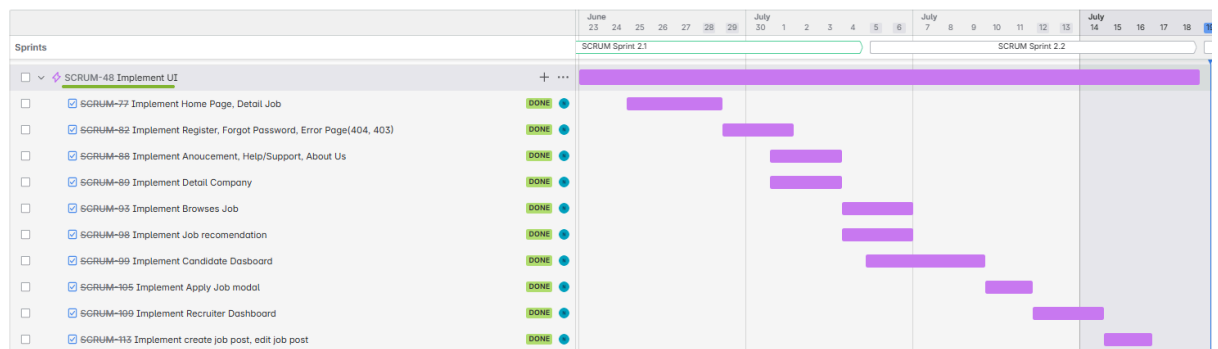

designs are structured for consistency, accessibility, and alignment with the project's style guide.

- UI/UX & Use Case Refinement

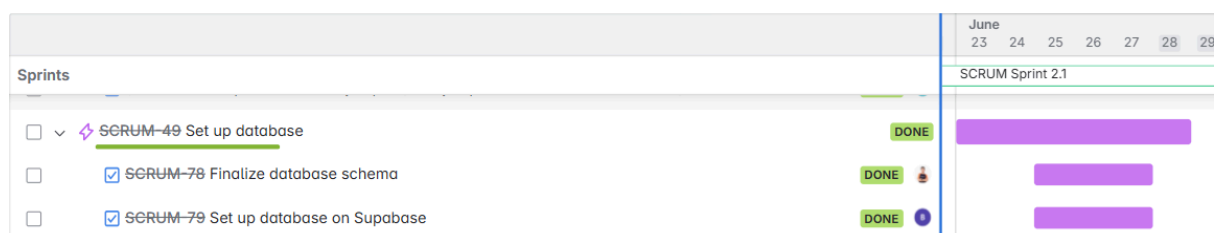

After developing the UI and prototype, we identified inconsistencies in the use case specifications. As a result, we reviewed and revised the specifications to ensure alignment with the actual user flows and interface behavior.

- Implement UI:

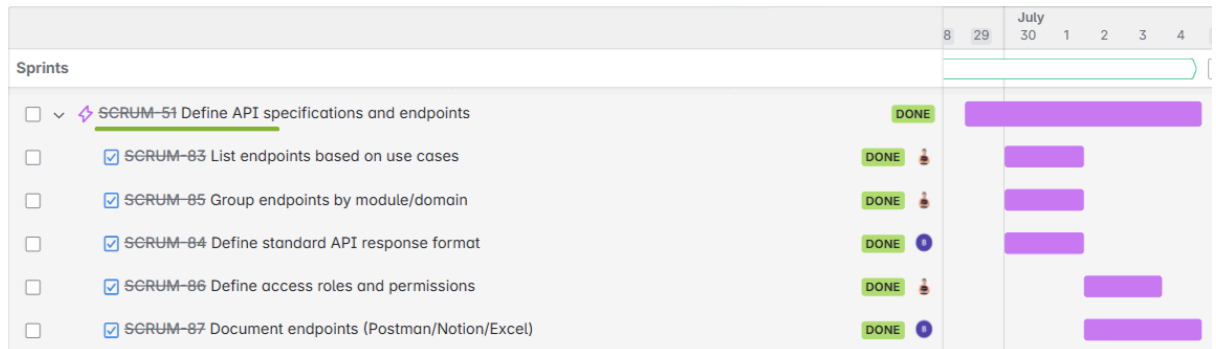

Nhur Quỳnh has implemented several frontend pages based on Diễm Xuân's design. However, the work is not yet complete, so this EPIC will likely be extended into the next PA.

- Set up database:

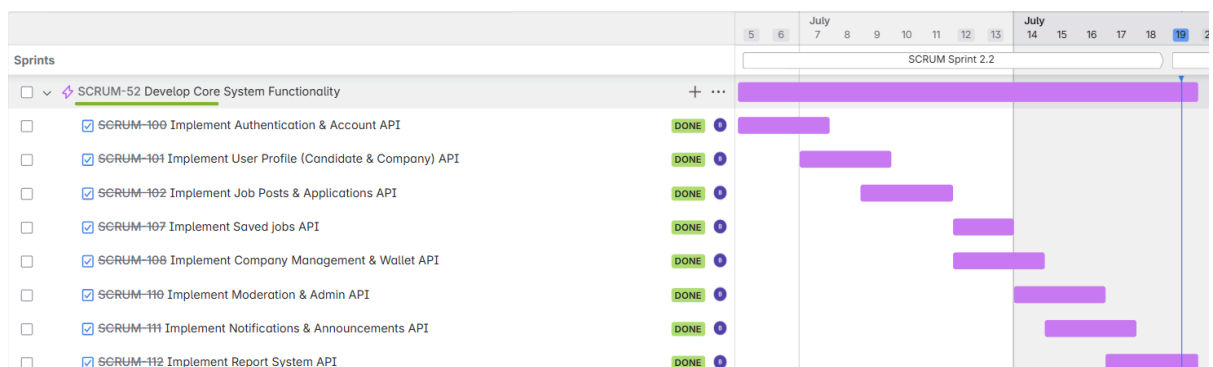

Anh Khoa discussed with Minh Duy to finalize and successfully set up the database on Supabase.

- Define API specifications and endpoints:

Anh Khoa and Minh Duy listed and grouped API endpoints based on use cases and modules, defined a consistent response format, set access permissions, and documented all endpoints

- Develop Core System Functionality:

In this sprint, the backend team successfully implemented all essential APIs powering the core features of the platform, including:

- Authentication & Account Management
- User Profiles for Candidates and Companies
- Job Posts, Applications, and Saved Jobs
- Company Management & Wallet
- Moderation & Admin tools
- Notifications, Announcements, and Reporting System

This marks a major milestone, ensuring the system backend is ready for integration with the frontend and further feature expansion.

Ongoing tasks:

- The Integrate Frontend and Backend epic will be postponed to the next PA, due to slower-than-expected progress on UI design and frontend implementation.
