

Class: 23CLC09 - Introduction to Software Engineering

Group ID: 02

Group name: PixelCrafters

Project name: Jobify

## SPRINT REVIEW MEETING MINUTES

Sprint 3 (19/07/2025 - 02/08/2025)

Host: 23127211 - Nguyễn Lê Hồ Anh Khoa

Secretary: 23127211 - Nguyễn Lê Hồ Anh Khoa

Time: 13h00 - 02/08/2025

Members present: 4

**23127211 - Nguyễn Lê Hồ Anh Khoa**

23127040 - Bùi Minh Duy

23127254 - Nguyễn Thị Như Quỳnh

23127524 - Hình Diễm Xuân

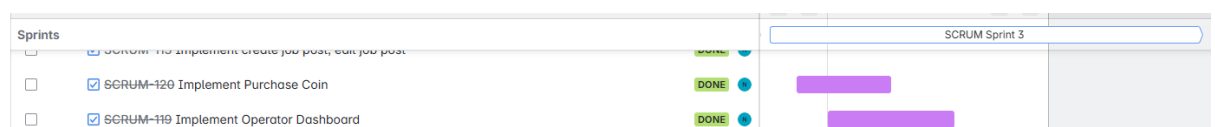

Members absent: 0

General: In this PA, my group uses AI tools to learn about SAD and class diagram, I will send the attached prompts

### Completed tasks:

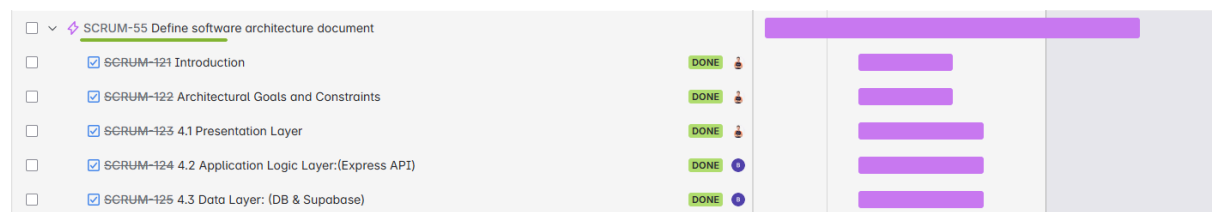

- Implement UI: Như Quỳnh continued implementing the remaining pages that were not completed in the previous PA

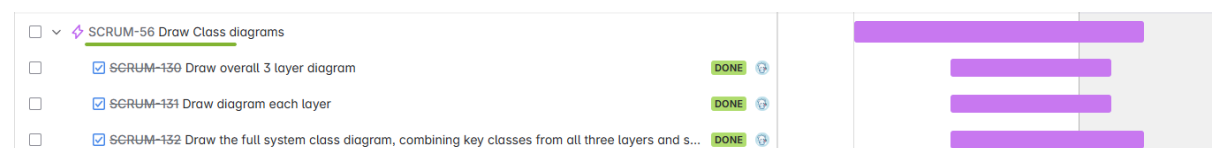

- Integrate Frontend and Backend: At the beginning of the sprint, the team was focused on completing the **Architecture Document**. In addition, due to limited experience in developing backend systems for platforms, several bugs were encountered in the API implementation. As a result, the team was unable to fully meet the initial plan and timeline.

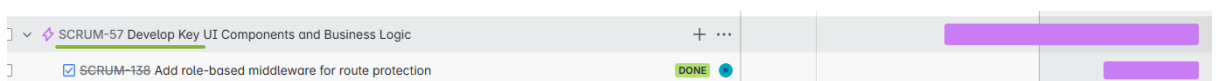

- Revised Use-case specification document: have some changes, detail in changes.txt
- Define software architecture document: Anh Khoa and Minh Duy were responsible for writing the Software Architecture Document.

- Draw class diagrams: After the Software Architecture Document was completed, Diễm Xuân used it as a reference to design the Class Diagram.

- Develop Key UI Components and Business Logic: Since Nhu Quỳnh had already implemented the UI in detail beforehand, there wasn't much additional work required in this phase.

- Deliver Internal Demo (Alpha Release): We have completed API integration for key features: login, edit profile, create job post, view job details, and view company profile. Basic flows for Candidate and HR roles have been partially tested using sample data. The remaining features will be completed in the next PA.
